(Optional) Going further

Welcome to the going further section!

Now that you have a good understanding of using Kiro, you can explore additional Kiro capabilities to further increase your productivity using sophisticated agentic features.

These topics can be completed in any order, and the features can be used in either spec or vibe mode.

Capabilities include:

- **Subagents** - Leverage parallel execution and specialized agents to speed up development.
- **Checkpointing** - Learn how to save and restore agent state for long-running workflows.
- **Hooks** - Create hooks that automatically run quality checks and maintenance tasks.
- **MCP servers** - Connect external services via Model Context Protocol.
- **Skills** - Package reusable instructions that Kiro activates automatically when relevant to your task.
- **Kiro powers** - Discover advanced Kiro capabilities and features.
- **Kiro CLI** - Explore the Kiro command-line interface that enables you to use Kiro agents in your favorite terminal.
